Regarding the secunity discrepancy between the fluires of the world's cotton production given on the chart published by the tariff loard and the figures published in census bulletin No. III the board has had the matter examined with the following results:

The census figures in giving the year line on page 20 of the bulletin do not state the exact period covered and mean the crea year 1910, that is, commencing September 1, 1916, and ending August 21, 1911, whereas the figures of the board 1911.
